Titel

SPELLBOUND

Autor/in

Alicia Ripp

Beschreibung (en)

"Spellbound" is a narrative 2d game about my personal experience with a condition called "Maladaptive Daydreaming", Depression, post traumatic stress disorder and suicidal thoughts. It depicts my reality from the point of view of a character called Vera, who suffers from the same conditions as I do. Players experience a therapy session in which they get to follow Vera's story. Please read the trigger warnings before you play through the game. <https://schlossgespenst.itch.io/>
